Made for the Mac. Customized for Your NEW Power Macintosh® G3.

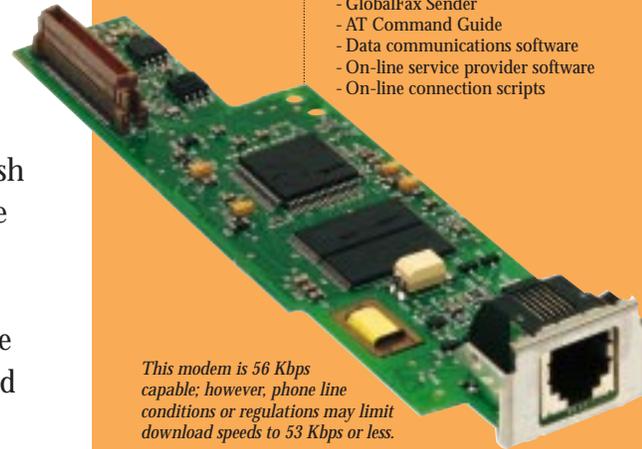

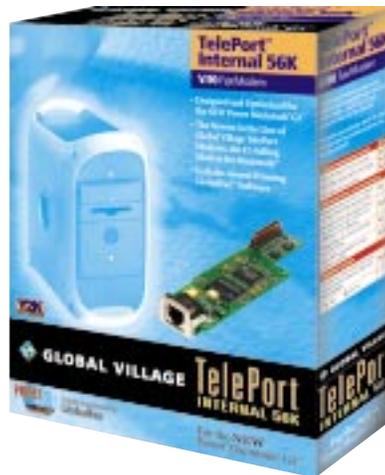

So you just bought a new Power Macintosh G3 computer? Global Village has the modem you need! The manufacturer of the #1-selling modems for Macintosh® has released a modem especially designed and optimized for the NEW Power Macintosh G3. The TelePort Internal 56K is designed to be installed in the modem communications slot inside your computer, allowing you to save your PCI slots and USB ports for other resources! With features not found in any other modem this affordable, the TelePort Internal 56K comes complete with everything you need for quick setup and the fastest possible Internet access—up to 56 Kbps*—over standard phone lines.

State-of-the-Art Internet Technology

The Global Village TelePort Internal 56K includes features you just won't find with other 56K modems. Included free is award-winning GlobalFax™ software—a \$39.99 retail value! The exclusive Setup Helper on-screen assistant guides you quickly and easily through GlobalFax setup. Plus, our TelePort Internal 56K features flash ROM technology, maximizing upgradability as standards evolve. It's the unbeatable value that's made Global Village the preferred brand of fax modems among Macintosh owners everywhere!

With speeds of up to 56 Kbps, the TelePort Internal 56K cuts Web page and remote access downloading time almost in half!

This modem is 56 Kbps capable; however, phone line conditions or regulations may limit download speeds to 53 Kbps or less.
