## TANDY 200

CALCULATOR
------------

.

			(BKSP)	Deletes the last character
(MUM)	Turns on and off the numeric keypad.		(SHIFT)(DEL)	Deletes the last entry
(NUM)(GRPH)	Turns on the calculator.	•	(SHIFT) DEL) twice	Deletes the entire operation
(GRAPH)(NUM)	Turns off the calculator.		(ENTER)	Enters or continues a
(PRINT)	Prints the display.	•		calculation
(LABEL)	Turns on and off the		$\odot$	Adds (same as (±))
	function-key display.		P	Subtracts (same as 😑)
(SHIFT)(BREAK)	Stops the current operation.		Ē	Multiplies (same as 💌)
BASIC			$\Box$	Divides
DAV\$ "day"	Sets the Main Menu to the		MA	IN MENU
	current <i>day</i> (MON, TUE, WED, THU, FRI, SAT, SUN).		( <u>F1</u> )	Moves to the next RAM bank.
DATE = "mm/dd/yy"	Sets the Main Menu to the current date.		( <b>F4</b> )	Copies a file to another bank.
TIME\$ "hh:mm:ss"	Sets the current time		( <b>F5</b> )	Deletes a file.
NAME ''oldname'' AS ''newname''	Renames a file.	•		

4

DICOD

# TEXT

,

 $\frown$ 

\_\_\_\_

# **TEXT CURSOR MOVEMENT**

$\overline{}$	Moves right 1 character.
-	Moves left I character.
	Moves up 1 character.
	Moves down 1 character.
(OHIFT)	Moves to the right word
(SHIFT)(-)	Moves to the left word
	Moves to the right of the line
CTRL -	Moves to the left of the line
(SHIFI)(T)	Moves to the top of the display
(SHIFT)()	Moves to the bottom of the display
CTRL ()	Moves to the top of the file
	Moves to the bottom of the file

# **TEXT EDITING**

.

.

•

SHIFT (DEL)	Deletes a character
(BKSP)	Backspaces and erases
(SHIFT)(PRINT)	Prints a text file, using parameters within these ranges: Width: 10 to 132 Left Margin: 0 to 121 Page size: 0 to 99 Line/Page: 0 to 99 Top margin: 0 to (page size line/page)
(PASTE)	Pastes the contents of the paste buffer.
(E1)	Finds text
( <u>F2</u> )	Loads a text file from cassette tape.
(F <u>3</u> )	Saves a text file on cassette tape.
<b>(F4</b> )	Selects records from a text file.
( <b>F5</b> )	Copies text into the paste buffer.
( <u>F6</u> )	Cuts text into the paste buffer.
(F7)	Selects text to cut or copy into the paste buffer.
( <b>F8</b> )	Returns to the Main Menu.

### **TELCOM**

## **TELCOM INTERACTIVE MODE**

(F1)

(F2)

(F3)

(F4)

(F8)

## **TELCOM TERMINAL MODE**

screen.

ACCOM INTERACTIVE MODE	(F1)
Finds and autodials a number stored in ADRS.DO. (The number	• ( <u>F2</u> )
must be enclosed in colons (:).)	( <b>F3</b> )
Autodials the number that you type and enter.	• ( <u>F4</u> )
Enters or displays TELCOM's parameters.	( <u>F5</u> )
Enters the terminal mode.	
Returns to the Tandy 200 Main Menu.	(F7)

Saves all transmitted information into a text file. Sends the information stored in a text file. Switches between the fullduplex and half-duplex echo modes.

Displays the previous

Prints all transmitted information on the printer.

Sends a special break signal, required by some host computers.

Disconnects from the terminal mode and returns to the interactive mode.

(F8)

.

## SCHEDL/ADDRSS/LIST

Finds records from NOTE.DO (SCHEDL), ADRS.DO (ADDRSS), or any text file (LIST) and lists

 $\mathbf{\overline{F1}}$ 

## MULTIPLAN

MULTIPLAN	CURSOR
MOVEM	ENT

	them on the display			
( <b>F4</b> )	Returns to NOTE.DO (SCHEDL), ADRS.DO (ADDRSS), or the current text file (LIST).	-	9988	Direction Keys. Moves cell pointer in the direction indicated. Continue moving cell pointer to scroll contents of window.
(F5)	Finds records from NOTE DO (SCHEDL), ADRS.DO (ADDRSS), or any text file (LIST) and		(CTRL)(1)	Home. Moves cell pointer to R1C1.
	prints them on the printer.			End. Moves cell pointer to
( <b>F8</b> )	Returns to the Main Menu.			lower right corner of the active portion of the
(LIST is a function of the TEXT program.)			worksheet.	

٠

٠

-

(<u>SHIFT</u>) +

Direction Key

Page Scroll. Scroll to show the next window of the worksheet in the indicated direction.

See also: Transfer Goto command

## **MULTIPLAN ACTION KEYS**

(BREAK) (CTRL)(C)	Cancels present operation and returns to main command line menu.
(ënter)	Carries out a completed command selected by a function key.
	Selects Multiplan commands
(LABEL)	Displays the command line on the bottom line of the screen display.
TAB	Moves to, and selects, entire contents of next field in a command line.
!	Recalculates entire worksheet. If typed in a formula, the formula is replaced by its result.
=	Tells Multiplan that the cell contains a formula.
@	Changes relative cell references to absolute references.

## MULTIPLAN COMMANDS

### $(\overline{F_1})$ — Edit Command

Lets you edit contents of a cell and responses in command fields. You can select the Edit command from any other Multiplan command to edit your responses.

Modes:

Edit Mode lets you use the direction keys to move the edit cursor within the command field.

Value Mode lets you use the direction keys to enter cell references while editing a command field. Press  $\overline{(E1)}$  twice to enter the value mode of the Edit command.

#### **Multiplan Editing Keys**

BACKSPACE	Deletes character to the left of the cursor	
( <u>deletë</u> )	Deletes character at current cursor position. Replacement text may be typed in.	1
-	Moves the edit cursor left one character if in the Edit mode; otherwise, moves thecell pointer left one cell and enters cell reference into the command tietd.	4
<ul> <li></li></ul>	Moves the edit cursor right one character if in the Edit mode; otherwise, moves the cell pointer right one column and enters the cell reference into the command field.	
	Value mode only. Moves the moves cell pointer down one row and enters the cell reference into the command field.	1
Ð	value mode only. Moves cell pointer up one row and enters the cell reference into the command field.	]

### (F2) — Blank Command

Replaces the contents of the specified cell(s) with blanks.

BLANK cells: cell(s)

Multiplan uses the active cell as a proposed response.

(F3) - Copy Command

Duplicates the contents of cell or group of cells.

RGHT DOWN FROM

Copy Right ( $(\underline{F2})$ ) copies the contents of one or more cells to the specified number of cells to the right of the cell pointer.

RIGHT # cells: 1 at: RC

Copy Down ( $\boxed{F3}$ ) copies the contents of one or more cells to the specified number of cells below the cell pointer.

DOWN # cells: 1 at: RC

Copy From  $(\boxed{F4})$  copies the contents of one or more cells to another location.

FROM:RC

to: RC

Note: *RC* denotes the current cell as Multiplan's proposed response.

#### **F4** — Format Command

Changes the display format or width of one or more cells.

Cell Wide

Format Cells ((F2)) lets you change the alignment and format.

Cells: *RC* #Dec: 2 Left Cen Rght Fix Gen \$

Format Width ((F3)) sets the column width of all cells. The width can be from 4 to 36. The default is 9.

WIDTH of cells: 9

(F5) - Name Command

Assigns a name which can be used to identify one or more cells in a command or formula.

NAME: refer to: RC

**F6** — Options Command

Controls two Multiplan options and displays the contents or tormula of the current cell

FORMULA: (formula of RC) Calc ! Beep Mute

- Calc recalculates all formulas when you change a cell.
- recalculates all cells only when you press
   (1).
- Mute turns off the audible alarm that indicates errors.
- **Beep** turns on the audible alarm that indicates errors.

#### **(F7)** — Transfer Command

Loads a worksheet into memory, saves the active worksheet to cassette or disk, clears the active worksheet or moves the cell pointer.

Transfer Load ((F2)) loads a worksheet saved in Normal mode from either cassette or disk or a SYLK file from RAM. The active worksheet is replaced.

LOAD filenome: filenome Norm SYLK

Note: RC denotes the current cell as Multiplan's proposed response.

Note: *RC* denotes the current cell as Multiplan's proposed reponse.

The filename may be:

CAS:*filename* saves the worksheet to cassette. The *filename* is optional.

drive: filename saves the worksheet to disk.

Transfer Save ( $(\boxed{F3})$ ) saves the active worksheet to either cassette or disk in Normal mode or to RAM in SYLK mode.

SAVE filename: *filename* Norm SYLK

The filename is the same as Transfer Load.

Transfer Clear  $(\underline{\mathbf{F4}})$  clears all cells in the active worksheet.

CLEAR sheet - Enter Y to confirm:

Transfer Goto ((F5)) moves the cell pointer to the specified cell.

GOTO cell: RC

**F8** – Exit Multiplan

Exits Multiplan and saves the active worksheet to RAM.

(PASTE) - Insert

Lets you insert row(s) or column(s) in the worksheet before the specified cell.

PASTE #: 1 Row Col before: RC

(PRINT) — Print Window

Prints the current window as displayed on the screen.

<u>SHIFT</u>(PRINT) — Print Worksheet

Prints all or a portion of the active worksheet using the specified width.

width: 70

from: R1:99

Note: *RC* denotes the current cell as Multiplan's proposed response.

Note: *RC* denotes the current cell as Multiplan's proposed response.

## **MULTIPLAN FORMULAS**

Formulas are composed of constants, references to cells, and functions.

#### Cell References

Rn or Cn	Active row or column.
RnCn	Intersection of row and column.
Rn:m or Cn:m	Range of rows or columns,
R[+ <i>n</i> ] or C[+ <i>n</i> ]	Row <i>n</i> below the active row or the column <i>n</i> to the right of the active column. The $+$ sign may be omitted.
$\mathbb{R}[-n]$ or $\mathbb{C}[-n]$	Row $n$ above the active row or the column $n$ to the left of the active column.
RnCn, RnCn	Union of two cells.

#### **Operations on Numeric and Text Values**

+	Add	INDEX(area, subscripts)
-	Subtract	Returns the value from cell in
1	Divide	area indicated by subscripts.
*	Multiply	
^	Exponentiation	

% Percent

#### **Multiplan Functions**

	ABS(n)	Absolute value of n.
,	AND(list)	True if all values in <i>list</i> are true; otherwise returns false.
	ATAN(n)	Arctangent of <i>n</i> in radians.
	AVERAGE(list)	Average of values in <i>list</i> = (SUM/COUNT).
	COS(n)	Cosine of the angle $n$ given in radians.
	COLUMN()	Current column number.
	COUNT(list)	Number of values given as arguments or by reference.
	$\mathrm{EXP}(n)$	e to the power n
	FALSE()	Logical value False
	IF( <i>logical</i> , Then value,	Else value) Returns Then value if logical is true; Else value if false.
	INDEX(area,subscripts	) Returns the value from cell in <i>area</i> indicated by <i>subscripts</i> .

INT <u>(</u> <i>n</i> )	Integer portion of $n$ truncated toward 0.	MAX(list)	Largest values in list.
ISERROR(value)	Returns True if value is an	MIN( <i>list</i> )	Smallest values in list.
	error value.	MOD(divisor, dividend)	
ISNA(value)	Returns True if <i>value</i> is #N/A value.	'	Remainder of the integer division of <i>dividend/divisor</i> .
LN(n)	Base e logarithm of <i>n</i> .	NA()	Returns the #N/A (not available) value.
LOG 10(n)	Base 10 logarithm of n.	NOT(logical)	Returns the opposite of the <i>logical</i> value.
LOOKUP(value,t	able) Searches for value in the first row or or column of table. Returns the contents of a cell	NPV(rate,list)	Net present value of cash flow represented by the values
from the last row or column of <i>table</i> . <i>Table</i> is a group of cells on the worksheet. The dimensions of table determine the direction of the search.			in list.
		OR(list)	True if any value in <i>list</i> is true; otherwise returns false.
		PI()	Value of pi (3.14159).
Table of Columns       500     X     5       value between     1000     X     7		ROUND(n,m)	<i>n</i> rounded to $m$ decimal places.
1000 and 1499	1500 X X 9 returned	ROW()	Current row number.
	2000 X X 13		
	2500 X X 17	SIGN(n)	Returns $-1$ if $n < 0$ , 0 if $n = 0$ , otherwise 1 is returned.
	3000 X X 22		otherwise I is returned.
	3500 X X 27	·	
	4000 X X 33		
l	4500 X X 38		

\_

SIN( <i>n</i> )	Sine of the angle <i>n</i> specified in radians.
SQRT(n)	Square root of n.
STDEV(list)	Standard deviation of the values in <i>list</i> .
SUM(list)	Sum of values in list.
TAN(a)	Tangent of the angle $n$ .
TRUE()	The logical value True.

.

### **Error Values**

#N/A	Data not available.
#NAME?	Name not defined.
#NUM !	Overflow or illegal arithmetic.
#DIV/0	Division by 0.
#REF!	Reference to nonexistent cell.
#NULL!	Intersection of disjoint areas.
#VALUE!	Wrong type of value used.
